

[www.thybar.com](http://www.thybar.com)

Thybar offers their customers a superior weld with the tightest tolerances available today through advanced laser technology. Their commitment to their customers is to create superior curbs with the most advanced production systems available today while keeping prices competitive.

Thybar has been a manufacturer of custom sheet metal products for over 45 years for the HVAC and sheet metal industries. Five locations (Illinois, Ohio, Kentucky, Texas, and Nevada) are fully staffed and equipped to assist in product selection, writing specifications, and confirming tight delivery schedules. Thybar utilizes state-of-the-art fabrication equipment, advanced laser technology, CAD drafting aids, plus experienced professionals to provide a full line of quality roof curbs and accessories, such as:

- The patented Vibro-Curb® rooftop curb for vibration isolation applications. It incorporates adjustable spring isolators and a roof curb into a single unit. Vibro-Curbs are available in 1", 2", or 3" deflections.
- Thybar's seismic curbs for rooftop HVACs are specifically designed to withstand severe wind loads or seismic activity.
- Thybar is the leader in adapting new rooftop units to existing roof curbs with the Retro-Mate®. The Retro-Mate saves costly curb reconstruction, preserves roofing integrity, reduces system down-time, and takes advantages of existing duct work. Multi-Zone Retro-Mates are also available.
- Thybar manufactures a line of competitively priced laser cut, all welded construction, AZ-55 GALVALUME®, insulated metal building roof curbs.
- Thybar will custom fabricate a base within 2 weeks that's cost effective...and top quality!

Thybar is the recognized leader in pre-fabricated curbs with an outstanding reputation for product quality and state-of-the-art engineering and service. Thybar is focused on providing their customers with a competitive edge through improved efficiencies from advanced technology. **COMPANY PROFILE:**

Thybar manufactures a complete line of top-quality laser cut prefabricated roof curbs, including a line of competitively priced, all welded construction, AZ-55 GALVALUME®\* insulated metal building roof curbs. Retro-fit Retro-Mate® adapters, equipment mounting supports, expansion joint systems, Vibro-Curb® and custom bases are manufactured to customer specifications at their five manufacturing plants in Illinois, Kentucky, Ohio, Texas, and Nevada.

\* Registered trademark of BEIC, Int'l, Inc.

# Thybar...a perfect fit!

Forget about removal of existing curbs when replacing rooftop units.

Thybar's Retro-Mate<sup>®</sup> is custom made to adapt your existing curb to a new rooftop unit. It saves time & costly roof reconstruction, preserves roofing integrity, reduces system downtime, and takes advantage of existing duct work. Our comprehensive library of new and old rooftop specifications lets us design a matching Retro-Mate<sup>®</sup> without extensive field measurements. Reduced engineering and construction time lets you bid more competitively!
