

100% Designed, Engineered, Manufactured and Supported in the USA.

American made quality equipment and superior customer service.

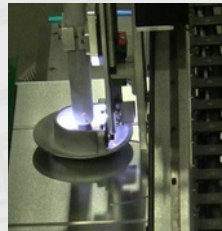

"Where superior duct work begins"

VICON is the industry leader for the complete automation of the duct fabrication process. With patented features and innovative solutions, VICON caters to all your manufacturing needs.

Designed, engineered, manufactured, and supported in the U.S.A., their advanced machinery delivers exceptional precision and speed, reducing costs and minimizing material waste.

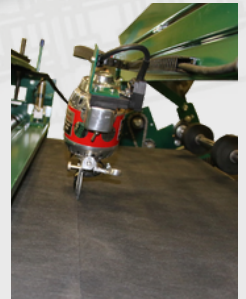

Coil Spool Assembly
US Patent #7,673,915

Optional Coil Line Plasma Cutting
US Patent #9,393,638
US Patent #9,731,376

Optional Four Position Insulation Holder
US Patent #7,926,757

Heavy Duty Liner Shearing
US Patent #9,981,399 B2

Dual Head Corner Inserter
Vertical dual-head automatic corner insertion machine. Adjustable from 36"- 60" length straight duct joints. 16-26 gauge material capacity.

Single Head Corner Inserter
Heavy duty frame structure designed for single corner insertion of flanged duct fittings. Machine utilizes various brands of TDX™, TDF™, TDC™ stackable corners. Standard tooling designed for 16-26 gauge duct.

Pittsburgh Seam Closer
US Patent #9,375,776
US Patent #9,511,409
US Patent #9,623,472
US Patent #10,160,027
